INTRODUCTION and WELCOME

After 19 years of history, the “RallyMobil” Championship achieved enough maturity to host a rally world championship date. A sports structure of the first order with more than 50 cars of the R group under the considerations of the International Automobile Federation (FIA), a great level staging and a commitment from the authorities and our country’s police department, that gives us peace of mind to be a valid alternative for the development of the WRC in Chile.

We have considered the city of Concepción as the epicenter for this great event, as it is the second capital of our country, with the sea, air, and terrestrial access routs of the first level for an access to the public from all latitudes. We are convinced that this will be one of the most attractive rallies on the calendar, with the best and safest roads for this specialty, and with the necessary elements to provide a great show.

I would like to thank all those who have made this possible: Starting with the Regional Government of Biobío, the municipalities of Talcahuano and Concepción, our main sponsors “Mobil” and “Copec”, the official teams and the brands associated, and of course the Chilean Police Department, one of the best policeman in the world, and a key institution to make sure that each race is very safe for all those participating and witnessing.

Welcome to Chile, and to our RallyMobil Championship.

Felipe Horta Cáceres
Chairman

THE ENVIRONMENT

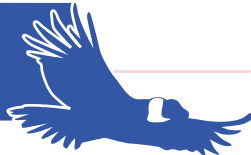

The organisation of the Copec Rally Chile is committed to the environment and to sustainability, and therefore, a series of environmental policies were introduced during last year's event, as a consequence of which the Rally was recognised with the Achievement of Excellence level by the FIA SUSTAINABILITY PROGRAMME ACCREDITATION.

This year, we will continue to apply these policies and to work in order to improve them further, to reduce the environmental impact of the Rally as much as possible.

Environmental Policy

In order to continue reducing the environmental impact caused by the Rally, we are implementing the following measures:

- To carry out **environmental awareness tasks** among the public
- **To reduce** the travels by the Organisation as much as possible and to use **hybrid** and **electric vehicles**
- **To respect** all applicable legal regulations
- **To disseminate** and promote our environmental policies
- To set up a **recycling area for special waste**, in the Service Park, the use of which will be compulsory
- **The washing of cars** shall only be allowed in the **authorised areas**
- To set up **containers for the selective waste disposal** in the Service Park
- To set-up **recycling containers in the public areas of the different stages**
- **To raise awareness among spectators** at the stages about the need to share vehicles
- To try to **reduce the energy consumption** as much as possible
- To give priority to the use of **digital supports**
- **To calculate and reduce the CO2 footprint** generated by the Rally
- To provide full collaboration to the **environmental agents of the area**

2.3 - BRIEF EVENT HISTORY

Chile's candidacy to become one of the World Rally Championship (WRC) headquarters for 2019, 2020 and 2021 was a result of an idea that grew little by little, which is now a reality in the hands of the Federation Internationale de l'Automobile (FIA) and WRC executives.

On December 8th, 2012, the Renault Clio R3 debuted in Chile at the Motorshow, in front of the Government Palace with 20 thousand spectators. Three Citroën DS3 and a Honda Civic R Type joined the four cars, debuting in Osorno on the first round of season 2013.

After such step, thought was given to moving forward and the next thing to do was to learn more about the WRC rounds and know what the requirements were to try to become a candidate. First, it was necessary to update RallyMobil with homologated cars and also take a leap towards sequential gearboxes, get all-wheel drive and continue to seek further improvements in carrying out local competitions.

Another significant step was to reach out to FIA and WRC authorities. Therefore, several journeys had to be undertaken and it was necessary to meet, listen and learn from the experts.

In 2016 the first official presentation was carried out with the aim to get a WRC round. RallyMobil's organization staff and Copec showed it was posible, that the was a commitment on the part of regional government, with the support of Carabineros de Chile (the republic's police), as well as a constant collaboration of the Fire Brigade. Thus Chile proved it could get the job done.

In the same year, trips to WRC rounds went on to gather more experience and strengthen links with the FIA and WRC. This is when a real chance to start a formal candidacy in 2017 rises for the first time. R2 and R3 kept on growing, yet another step was meant to be taken; R5 cars had to arrive in Chile. It was Pedro Heller on his own who was able to introduce the power of these machines.

On May 2nd, 2018, WRC executives were received in Chile for the first time, German Olivier Ciesla and Australian Simon Larkin. A big gala launched season 2017 and set the formal opening of Chile's presentation as a candidate for hosting a World Rally Championship round.

The beginning of the road faced certain targets that RallyMobil was meant to hit successfully: Win a Candidate Event and hold such a show perfectly, and get a positive report from FIA. At the same time some Chilean ambassadors began to shine at the WRC; Pedro Heller was the first one and was later joined by Emilio Fernández, who participated in Junior WRC in 2018.

Season 2018 kicked off with the Candidate Event in Concepción. In addition to this, the powerful R5 cars arrived at the championship, which meant a significant progress in sport for Chile. Nine cars by Ford, Peugeot, Mitsubishi, Citroën and Skoda began their journey through our roads.

The Candidate Event in Concepción lived up to expectations. It developed with an outstanding audience and the presence of important representatives of the manufacturers, also in the eye of FIA and WRC observers, who did not hesitate to speak well of the good job done by RallyMobil during the competition.

5 SERVICE PARK

5.1 - LOCATION

The Copec Rally Chile Service park will be located at the large compacted car park area of Marina Del Sol Casino, same location than in previous years.

This park will be the only Service Park used during the rally.

The Service park is located at 100 m. of the Rally HQ, (Hotel Sonesta) and only 100 m from the Podium in Hotel Sonesta.

Service park location coordinates **S 36° 46.677'**
W 73° 04.337'

5.2 ACCESS TO THE SERVICE PARK

WRC Manufacturers service vehicles will be allowed to enter the Service park area from Thursday May 2nd, 08.00 hrs.

Other teams will be able to access to the Service Park from 12.00 hrs. on Sunday May 5th 2019. Should any team need to access the park before this date or should they arrive at night, when the normal access is closed, please contact Macarena Del Sante by e-mail: mdelsante@hortaproducciones.cl or calling to the Rally office +56 (22) 8348800 or mobile +56 (9) 99191581.

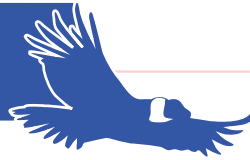

From Monday May 07th, 08:00hrs to Monday May 13th, 20:00hrs the park will have a security service. Teams needing exclusive security service for their service area must request it. (Please use the Service park facilities form available in internet).

Only duly accredited vehicles with the plates provided by the organisation will be allowed to access the Service Park and corresponding vehicle parking areas.

- **SERVICE** plates: access to the team's service area
- **AUXILIARY** plates: access to the vehicle parking area located a few meters from the service park.
- **VIP, ORGANIZATION** and **MEDIA** plates: access to the vehicle parking area located a few meters from the service park

The plates will be provided during the administrative checks, according to Art. 4.4 of Rally Guide 1.

Coaches that are not part of the organization are not allowed to access the Service Park or the Auxiliary car park (even if they have a Service or Auxiliary plate).

Service vehicles arriving before the teams have been at the administrative checks to get the corresponding documents and necessary vehicle plates, will be able to access the Park without a plate. However, from Tuesday May 07th at 12.00 a.m. all vehicles will have to be duly fitted with the corresponding plates. From that moment on there will be an exhaustive control in order to guarantee that all vehicles parked or trying to access the Service Park carry the necessary plate.

On the day of arrival of the service vehicles at the Service Park, they will be received at the entrance by Service Park staff who will guide them to their respective service area.

5.5 - ENVIRONMENT POLICY

The Copec Rally Chile wants to announce the commitment of the Organisation with environment policies. We all make a huge effort to achieve the set targets, but we also depend on everybody's collaboration.

All participating teams are one of the keys to achieve these targets and therefore we are particularly requesting your collaboration.

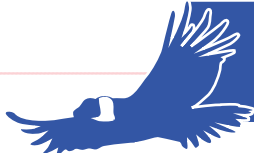

- The current legislation in Chile on environmental issues, affects both institutions as well as legal entities and individuals. Our activity has a strong impact on the environment, which is why we ask the TEAMS for their utmost collaboration.
- Just as in previous years, there will be homologated containers in the Service Park, which are to be used for separate waste disposal, conveniently marked to this end. Teams are requested to use these containers as the only waste disposing site, and to respect the selective disposal procedure.
- Likewise, we ask you to take the adequate measures to avoid any incident that may lead to uncontrolled spilling, especially of liquids, outside the area that has been allocated to your team in the Service Park.
- Do not hesitate to contact our Service Park manager if you have any question or doubt.
- Helicopters must comply with the legislation in force as well as with the specific rules for this event, which will be provided during the usual pre-event briefing (Helicopter Pilots' Briefing).
- Failing to comply with the regulations regarding the Environment Policy may be penalised.

5.6 - TELEPHONE LINES REQUEST

Requests for telephone lines to be used in the Media Centre at HQ, Manufacturers press room and Service park can be made through your respective PTT, or directly to Copec Rally Chile.

PTT

In case that you make the request to your PTT, check with them the deadline to ensure that the request from your PTT arrives on time. Hortaproducciones can't guarantee your lines during Copec Rally Chile if your request comes through your PTT. Please check with them the minimum deadline to guarantee your lines in Concepción.

Telefónica del Sur

- You can send your request of lines directly to Copec Rally Chile, and will send your request directly to Telefónica del Sur. This special agreement between Telefónica del Sur and Copec Rally Chile can ensure that all requests received by Horta Producciones before Friday March 09th will be guaranteed.

Should you decide to contract your lines through Hortaproducciones, please send us the application form (published on the rally website under the section “Documents/Forms”), to the Rally Office before 1st March 2019.

6 TWO-WAY RADIO

All radio-electric transmitter installations in cars are always subject to a previous authorization request. A frequency assignment is to be asked for at the Chilean Telecommunications Offices. We inform you that Motorola cannot allocate frequency pairs that do not comply with Chilean regulations stating that reception and transmission frequencies must be separated. In Chile, this separation must be:

UHF 410-465 Mhz. High frequency transmission repeater, separation between RX and TX 10 Mhz.
VHF 146-174 Mhz. High frequency transmission repeater, separation between RX and TX 4.6 Mhz.

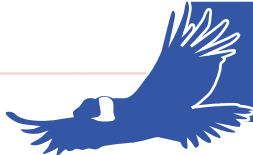

Even with the best of intentions in order to provide us with the requested frequencies, the Telecom staff cannot legally authorise us to use frequency pairs that do not comply with these requirements.

- Radio frequencies request fees **430€** (19% VAT included)

Competitors wishing to use 2-way radios during the rally will find the Radio Licence application form on the rally website www.copecrallychile.com under the section "Documents/Forms".

The Rally Office must receive all applications for licences, with payment, **before Friday March 01st 2019.**

Any infringement of the law will render the breachers liable to proceedings and if their frequencies interfere with the organisation network sanctions could **lead to exclusion.**

7 FUEL / TYRES

7.1 - FUEL

Competitors must comply with 2019 FIA WRC Sporting regulations Art. 59

All FIA priority drivers (P1, P2 and P3) must use FIA fuel as provided by the FIA-appointed supplier.

15.14 - BIO BIO & CONCEPCIÓN – HOST CITY

This city is located in the Southern Hemisphere in South America, at 36° 46'22"S latitude and 73° 39'47" W longitude, with an average elevation of 12 masl, in the Valle de la Mocha between the coastal plains and the Coastal Range. It is located in the extreme south of the central zone of Chile, in the geographic center of the country.

Concepción is a large community and capital of the Biobío Region. The urban nucleus of Concepción exerts a significant impact in the national commerce when being part of the region with more industrialization of the country.

It limits to the north with Hualpén, Talcahuano and Penco; to the south with Chiguayante and Hualqui; to the east with the commune of Florida and to the west with the river Biobío and the communes of San Pedro de la Paz, Coronel and Lota. Formerly it was located in the Bay of Concepcion, in the territory that currently occupies the town of Penco, its name, “penquista”, derives from its first location.

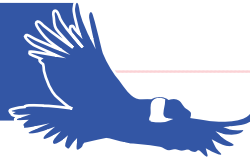

The city was founded in 1550 by Pedro de Valdivia under the title of the Spanish crown, under the name of Concepción de María Purísima del Nuevo Extremo, and was the capital of the Kingdom of Chile between 1565 and 1573, and was later maintained as the military and political center of the kingdom for the rest of the Chilean colonial period. Later, it was part of the first independence attempt of Chile in 1810, at the hands of the lawyer Juan Martínez de Rozas. It has been the center of the most populous regional conurbation in the country since the early twentieth century, and has as a cultural symbol the Plaza de la Independencia, where the solemn declaration on the Chilean liberation of Spanish realism took place.

The commune shelters varied bridges, murals, parks and lagoons. Concepción concentrates its activity in the services area and functions as the financial center of the Gran Concepción. It also has numerous colleges and universities, including the University of Concepción, the Universidad del Bío-Bío and the Catholic University of the Santísima Concepción.

CLIMATE AND GEOGRAPHY

The climate is Mediterranean with oceanic influence and a short dry season in summer. Its average annual temperature is 12.7 ° C, while the average in summer is 17 ° C and in winter 8 ° C. The thermal oscillations are moderate if we consider its latitude, this due to its proximity to the Pacific Ocean. The summers are mild and the winters mild. Precipitation is concentrated in the coldest months, being the period from May to August the one that concentrates most of the rain. On the contrary, summer is dry.

The city is geographically bordered by two important rivers: the Biobío to the west and the Andalién to the north. These demarcate geographically to the city. In addition, it is crossed by Estero Nonguén, which is born in the valley.

In Concepción, there are also five urban lagoons: Lo Méndez (5.2 hectares), Lo Custodio, Lo Galindo, Las Tres Pascualas (5.9 hectares) and Laguna Redonda (4.1 hectares). The Pineda lagoon is added to them in the rural sector.

Additionally, in the city there is the Paicaví wetland, which is one of the largest within the Great Conception, protecting a large number of species, including more than 70 species of birds. The wetland also has a function to evacuate rainwater.

POPULATION

The commune has an area of 221.6 km² and a population of 480.609 inhabitants. It receives 11.61% of the region. 1.88% corresponds to rural population and 98.12% to urban population. Between 1970 and 1982 there is a large increase in population. One of the causes is the inclusion of San Pedro, segregated from the commune of Coronel. Concepción strongly decreased its population due to the fact that in 1996 it was divided, creating Chiguayante and San Pedro de la Paz. In these communes the population has grown rapidly since they have been transformed into “bedroom communes” of Concepción, that is, more residential sectors, which do not have a center with much trade, such as Concepción.
