Appendix 6

MNASZ requires the use of the RSB GPS Tracking System for all starters of the Rally Hungary. Use and operation of the equipment is obligatory for the whole duration of the race! By signing the entry form, the competitors agree that the operator of the GPS system will pass the data to the organizer, the race management. The installation of GPS equipment in the race car and its proper operation will be checked by the scrutineering for each participant: The GPS unit must be positioned behind the seats at the height of the window (not on the floor) in the race car. At the end of the race or after the race, the GPS unit must be handed over to the race office immediately.

INSTALLATION OF SECURITY TRACKING EQUIPMENT (GPS)

Optional administrative takeover or the installation of GPS equipment received at the administrative acceptance in the race car and its proper operation will be checked at the Technical Acceptance.

a.) GPS unit and accessories (installation kit)

GPS device, Velcro fastener, 12V cigarette lighter power cable, SOS panel connection cable (which provides 12V power in the racing car and connects the SOS panel to the GPS unit during the race).

b.) Installation of speed control equipment in the racing car

Racing cars must be equipped with a 12V direct-on power supply after the disconnect switch on the right side of the B-pillar, which also has a 5A fuse. Mounted in the race car using the Velcro fastener supplied with the device for the right "B" pillar, by connecting the cable on the SOS panel to the GPS device with the 15-pin connector and the 12V power supply. **The installation of GPS units in the race car and its proper operation will be checked at the scrutineering for all entrants.**

c.) Safety Emergency Console (SOS panel) operation and use of the GPS device during the competition:

The SOS panel must be positioned in the racing car so that it is accessible to both riders when wearing a seatbelt. It is recommended to place it between the 2 racing seats on the floor or on the passenger compartment roof. In case the SOS signal is justified (the rider needs help), all you have to do is switch on the red switch under the lid (switch to another position), which will cause the device to send an alarm to the Race Center. The SOS indication is deactivated by resealing the red switch cover.

d.) Return of GPS unit and its accessories

Competitors must remove the GPS unit from the race car as soon as possible and at the end of the race at the latest by the end of the race and hand it over to the race office or GPS operator at the end of the race at Parc Fermé.
