The spike checks can be made at any control point at any time during the rally.

For rally winter tyres and tyres with ECE-homologation without „M+S“ (or "MS", "M.S.", "M/S", "M&S" or "M-S") stated on them the following stud specification applies:

Maximum diameter of the stud is 6,5mm, maximum weight of the stud is 2 grams, maximum excess length over the tyre is 2mm, maximum stud length is 15mm with tolerance of 0,5mm. Only studs pressed into the tyre from the outside are allowed. Studs that go through the tyre are not allowed.

All road-legal winter tyres with ECE-homologation with „M+S“ (or "MS", "M.S.", "M/S", "M&S" or "M-S") stated on them can use either studs specified above or the original studs used by the manufacturer as long as they comply with the current version of the KFG (federal motor transport laws).
