1. WELCOME AND INTRODUCTION

Welcome

We are glad to welcome you to our Rally Chile BIOBÍO 2023. The biggest motorsport event in Chile will take place from September 28th to 01st of October.

In 2019, we made history to bring the World Rally Championship for the first time to Concepción. This year we have the honour to welcome again WRC, its competitors, and the true fans.

COPEC RallyMobil National Championship has created a reputation throughout the whole World because of its amazing gravel stages and great atmosphere.

Thanks to the support of the Regional Government of BIOBÍO, local authorities, the 3 provinces and their 33 municipalities, our sponsors, official teams and brands associated, we are very proud to deliver this event and allow all rally fans a unique opportunity to enjoy a fantastic rally weekend with the huge support of the Chilean police department that is the key to make sure that each stage will be very safe for all those participating and spectating.

Locations

Rally HQ, Media Centre and Service Park will be in the MDS Hotel (Ex Sonesta Hotel) Talcahuano, Concepción. The Service Park will be located on the same spot as in 2019, the parking area of MDS Hotel and Casino and its surroundings. It will be the only Service Park used during the rally.

Route

The route consists mostly of twisty gravel stages, challenging to both cars and crews. The total distance of the rally is about 1.202,10 km. Sixteen special stages in total will cover about 312,78 km, which bring the rally to more than 26% special stage coverage.

The rally starts with Shakedown on Thursday morning, while as special stages are run from Friday morning to Sunday within 120 kilometre radius of Concepción. The special stage El Poñen is for the first time welcoming the Wolf Power Stage.

There will be 6 special stages, Friday and Saturday will each be made up of three unique special stages that will be repeated later on each day. Sunday will finish the rally with another 4 stages – 2 stages that will be driven twice. The Podium Ceremony will be held at the Stop of the Wolf Power Stage

In this Rally Guide One, you will find the information necessary to prepare your participation for the event. Should you require any further information, please do not hesitate to contact us. Our organising team is looking forward to helping you make your participation as easy as possible.

1.1. Environmental Policy

As part of the FIA Environmental Sustainability Program, Rally Chile Bio Bío goal is to continue to make the event more sustainable. While working both internally and externally, we aim to ensure that our events' impact on the environment is as small as possible. This is an ongoing process and includes provisions on special stages, in the service park and through our general administration tasks.

Specific goals of the organisation are as follows:

- Commit to continuously improve our environmental work.
- Constituting a high-level environmental governance within the organization of the event.
- Determination of each Stages based on a "multilayer criterion" - Multilayer Assessment of Career Determination (M.A.C.D.) - where the initial Stages proposal from Clerk of The Course is subjected to an exhaustive evaluation for the Conservation of Nature, considering national laws, international agreements such as WETLAND RAMSAR SITES by UNESCO and interested parties (NGO's) among others.
- Register and provide detailed information for all aircraft (Helicopters mainly) of all natural ecosystems identified in the Assessment and its strict prohibition of its overflight at less than 500 feet of altitude so as not to significantly disturb different competing Ecological Points of Interest (E.P.I.) or Areas of High Conservation Value Areas (HCVA).
- Educate and inform as many people as possible both within the organisation and externally of our environmental policy.
- Comply with relevant environmental laws and regulations of Chile, and other environmental requirements as well as the FIA Institute Environmental Certification Framework.
- Observing environmental work and environmental impact when we choose partners and suppliers and strive to choose products and services with proven good environmental performance.
- Seeking to limit our transports' environmental impact as much as possible and minimise the amount of fuel used by officials working on the event.
- Saving energy and use renewable energy sources where possible, minimize waste, recycle and energy recycle.
- Reduce the number of printed materials – documents using the largest number of digital sources or preferring papers from Sustainable Forest Management and Controlled Sources under seals such as PEFC and FSC.
- Complete identification neutralization of Greenhouse Gases through:
 - Measurement of the Carbon Footprint in Scopes 1, 2 and 3 using high performance protocols such as the GHG Protocol of the World Resource Institute - WRI
 - Verification reviewed by an independent third party (Deloitte)
 - Neutralization of the entire Carbon Footprint through Certified Emission Reduction (Carbon Credits) registered in the Clean Development Mechanism - CDM of the United Nations Framework on Climate Change and communicating the event's environmental efforts through activities with selected WRC crews in order to promote the competition's high commitment to caring for the environment.

14. LIST OF USEFUL FACTS AND SERVICES

14.1. Information about Concepción

Official name:	Concepción
Location:	BIOBÍO Region
Population:	912.000 (Statistics from 2022)
Official language:	Spanish
Currency:	Chilean pesos (CLP)
Area:	222 km ²
Land boundaries:	The city is in the Southern Hemisphere in South America, at 36° 46'22" S latitude and 73° 39'47" W longitude, with the average elevation of 12 masl, in the Valle de la Mocha, between the coastal plains and the coastal range. It is located in the extreme south of the central zone of Chile, in the geographic centre of the country. The city is geographically bordered by two important rivers: The BIOBÍO river to the west and the Andalién river to the north.
Time zone:	UTC-4 (CLT) Summer (DST) UTC-3 (CLST)
Sunrise:	25 September 2023 at 07.37
Sunset:	25 September 2023 at 19.51
Climate:	The climate of Concepción is classified as "Cool-Summer Mediterranean" climate. The cool waters of the Pacific Ocean help to maintain mild temperatures throughout the year. In the six-month period between May and October, the city receives approximately 83% of its total annual precipitation, whilst all months from November to April have been rainless on occasions. Summer season is dry and no temperatures above 22 degrees. The maritime cooling brings much cooler temperatures than nearby inland areas. Average temperatures during September and October are 7 degrees minimum and 17 degrees maximum approximately.
Water:	The tap water is safe to drink.
Electricity:	The electric supply is 220 volts. Plugs and sockets are of a two-pin design.
Telephones:	The International prefix for outgoing calls is 00 or + country code. The International prefix for incoming calls is +56, then delete the leading 0 in the area code.
Smoking:	Smoking is not permitted by law in enclosed public and workplaces.

14.2. Driving in Chile

Motorway tolls

We have motorway tolls in Chile, they must be paid in CASH ONLY, Rally cars included (carry always at least \$20.000 Chilean pesos daily).

If you are driving a rental car, a toll device might be included.

Traffic rules

Drive on the right and overtake on the left-hand side of the road.

The driver and all passengers are required to always use front and rear seat belts.

It is illegal to use a hand-held mobile phone whilst driving.

The blood/alcohol limit in Chile is 0 mg. The police have the power to carry out random alcohol tests on drivers at any time and a blood sample will be taken if a driver refuses a breathalyser test.

It is compulsory to have a fluorescent vest in the car.

It is compulsory to carry 2 red reflective triangle which, in the event of the car stopping, must be placed in a conspicuous position, in order to warn following drivers.

Speed limits

Except where a lower speed limit is indicated, the maximum speed limits in Chile are:

Urban areas: 50 km/h

Dual carriageway with motorway characteristics: 100 / 120 km/h

Motorway: 120 km/h

Exceeding the maximum speed limits may result in addition to a cash sanction the withdrawal of the driving licence.

The driver in the wrong is considered as the only responsible of the infringement(s).
